

CURRICULUM VITAE

Name: Elif Yılmaz
Email: elif.yilmaz@example.com
Location: Istanbul, Türkiye

EDUCATION

B.Sc. Software Engineering
Istanbul Technical University
2023 - Present

TECHNICAL SKILLS

Programming:

- JavaScript
- TypeScript
- Python
- C#

Backend / APIs:

- REST API development
- HTTP methods, status codes, authentication and JSON
- Node.js
- Express.js

AI / LLM:

- OpenAI API
- Anthropic Claude API
- Prompt engineering
- Retrieval-Augmented Generation (RAG)
- Function calling
- Agentic AI experiments
- MCP servers and MCP clients

Automation / Tools:

- n8n
- Zapier
- Make
- Cursor
- GitHub Copilot

Other:

- Git
- Docker
- PostgreSQL
- Redis

PROJECT EXPERIENCE

AI Research Assistant
University AI Lab
2025 - Present

- Built an internal document analysis assistant using OpenAI API.
- Implemented RAG using Python, embeddings and PostgreSQL.
- Created an agent capable of calling external tools based on user requests.
- Experimented with MCP servers and connected an LLM agent to external APIs.
- Documented experiments and compared multiple prompting strategies.

Automation Platform
Personal Project
2025

- Built workflows using n8n and REST APIs.
- Connected Google Sheets, Discord, OpenAI and custom HTTP endpoints.
- Used webhook triggers and authentication.
- Added error handling and retry mechanisms.

Student Project Management System 2024

- Developed a REST API using Node.js and Express.
- Implemented JWT authentication.
- Used PostgreSQL for data storage.
- Built a React frontend consuming the REST API.

LEARNING / RESEARCH

I regularly experiment with tools that I have not used before. When I encounter an unfamiliar technology, I usually read its documentation, create a small proof of concept and then integrate it into a project. I also use GitHub issues, documentation and technical articles when debugging problems.

INTERESTS

- Agentic AI
- MCP
- LLM applications
- Developer tools
- Automation
- Cloud computing
